

ejemplo 1

```
import java.util.*;
```

```
public class Controlif {
```

```
    public static void main(String[] args) {
```

```
        Scanner reader = new Scanner(System.in);
```

```
        Var1=reader.nextInt();
```

```
        System.out.print("Ingrese numero2: ");
```

```
        Var2=reader.nextInt();
```

```
        if(Var2){
```

```
            System.out.print("Los numeros ingresados son iguales ");
```

```
        }
```

```
    else{
```

```
        System.out.println("Los numeros ingresados No son iguales ");
```

```
    }
```

```
}
```

```
}
```
